1-7/8" (1110-T and 2110-T)

Problem:

You have seen the problems first hand. Misplaced, damaged or prematurely worn hoses and accessories are impacting your company's bottom line.

Solution:

Finally, a better way to care for, store and transport your vacuum hoses and accessories that are such an important part of your \$200,000+ vac-truck's performance. **FAST-VAC** now offers some innovative and affordable new products that will help solve these costly problems. Just look at our **NEW** Mobile Storage Systems. The storage and transportation possibilities are unlimited when using these great **HOSE SHUTTLE** products from **FAST-VAC**.

At **FAST-VAC** 99% of our portable hose and accessory products are designed to weigh less than 100 lbs and do not exceed 20 feet in length (*for hose and tubing*). With over 30 years of experience in the vacuum industry we understand that vacuum operators must physically move hundreds of feet of hose to alternative plant clean-up areas. These in-plant "carts" are easily towed with as little as an ATV, or riding lawn mower. The skid versions will fit in a pick-up truck box.

Our **NEW** Mobile Storage Systems are designed to handle 10-20 foot long vacuum products efficiently and safely. If the first vac-truck load on a job consists of dumping your expensive vac-hose in a pile before set-up, **FAST-VAC HAS A BETTER WAY.**

Hose Shuttles come with or without wheels (trailer or skid), and are as budget friendly as your needs require. Choose from the following models:
